

## Note

This guide applies to both 120 L & 240 L versions.

## Attaching the Add-on Label

- Locate the application area on the surface of the bin (front-right edge), about 20 cm below the lifting rim;
- Peel off the adhesive film and apply the add-on to the edge of the bin as shown in the image, pressing firmly to ensure proper attachment;
- You may customize the label using reflective stickers (sold separately), markers, laser engraving, or other preferred methods.
