

## Note

This guide applies to both 120L & 240L models, with or without drain hole.

The bin may be delivered assembled, if not, all parts are stored inside the bin body.

Before assembly, check that all components are present. If any parts are missing, contact the supplier.

This bin is RFID-ready (chip not included).

## Securing the Lid to the Bin

- Place the lid on top of the bin body, aligning it correctly with the edges;
- Identify the designated attachment points for the clips;
- Secure each clip by pressing firmly until you hear a "click," which indicates that it is correctly attached.

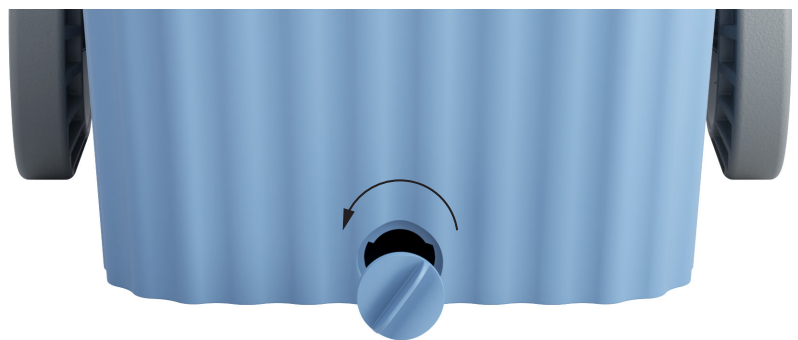

## Installing the Wheels

- Align the wheel axle with the designated holes at the base of the bin body;
- Insert each wheel onto the axle, ensuring it is positioned correctly;
- Press firmly until you hear a "click," indicating that the wheels are properly secured.

## Installing the Drain Plug

- Locate the drain hole at the bottom of the bin body;
- Insert the plug into the hole and turn it to secure;
- Check that the plug is positioned correctly to prevent leaks.

## Attaching the Add-on Side Label

- Locate the application area on the body of the bin (front-right side), approx. 20 cm below the lifting edge;
- Peel off the adhesive foil and apply the label, pressing firmly to ensure adhesion;
- You may customize the label using stickers (sold separately), markers, laser engraving, or other preferred methods.
