

WAVE Bin

Wave Bin transforms bin cleaning into a quick and simple task. Compliant with the EN 840 standard, it ensures high quality and reliable performance. Equipped with a drain hole and a sealed plug, the bin allows quick and frequent cleaning, guaranteeing good sanitation.

The ribbed body, along with the reinforced lid base and bin base, provides a fully reinforced structure, enhancing durability and prolonging the product's lifespan. The side label, available as an add-on, allows the user to enter their personal details, facilitating quick identification of the bin by the sanitation company.

Designed in Bucharest
Made  in Romania

Wave Bin is also available in a version without a plug, suited for general use where frequent cleaning is not a priority.

The bin can be used not only for household waste management but also for other practical purposes, such as:

- Temporary storage:
It can be used for storing materials such as compost, leaves or other garden waste, as well as other household items.
- Light material transportation:
Thanks to the wheels and handle, the bin is easy to maneuver, making it useful for gardening or DIY activities.
